

THE TITAN FORCE F6

WHEN LIVES ARE IN THE BALANCE AND SECONDS COUNT

THE TITAN FORCE F6

TURRETS:

Roof turret is capable of 600- or 1200-GPM and 300-GPM low-attack bumper turret is ideal for getting under fire. Also equipped with hydro-chem nozzles. Configurations are available with manual roof turret controls.

BODY:

Welded extruded-aluminum construction provides unparalleled strength and is available with durable painted or diamond plate exterior finish.

SPACIOUS CAB:

Spacious cab designed for one-person operation, but is designed for five person seating with comfort and safety in mind. Features improved gauge layout, increased visibility and barrier-style doors.

SUPERIORITY AT GROUND LEVEL

What if the most advanced vehicle on the runway never left the ground? That's the question E-ONE asked in developing one of the most technologically advanced airport response vehicles on the market – The Titan Force F6.

With the perfect blend of technology and toughness, The Titan Force F6 response vehicle provides unshakable confidence in every situation with industry-leading advancements. You will not find another vehicle on the runway with more usable compartment storage to ensure you have everything you need, right there on-site.

Its spacious 5-person cab provides comfort and safety inside, while its rugged exterior design delivers all the necessary benefits to get any job done. And when you get back from a call, service and maintenance is a breeze with its rollback engine cover. Certified by the ICOA and the FAA, The Titan Force F6 is your advanced solution for an unpredictable environment.

TANKS:

3170-gallon poly water tank and 433-gallon poly foam tank both with lifetime warranties.

CHASSIS:

Solid chassis features tubular frame rails for rigidity, standard disc brakes for improved performance and multiple suspension options.

ELECTRICAL:

Electrical systems feature multiplex wiring for improved reliability and modification capabilities. Other available options include camera, light towers, various operator options and LED lighting package.

EXTERIOR PUMP PANELS :

Access your controls and view your gauges standing up without having to bend down or reach into a compartment. Pump panel is structural and features LED tank level gauges.

COMPARTMENT STORAGE:

Largest usable compartment capacity in the industry. Fully enclosed and unobstructed from plumbing controls and connections with roll-up or pan-style doors.

TRIPLE AGENT:

Equipped with a 550-lb. Dry Chem vessel, a 460-lb. Halotron vessel and a 460-gallon foam tank.

Allows safer access to the top deck and serves as an engine maintenance platform.

From the only manufacturer in the industry that offers a rollback engine cover and dual maintenance platform, accessing the engine is easier than ever.

Dual propellant bottles are at the rear of the unit with a drop-down storage design that can be easily serviced by one person from ground level.

Exterior pump panel for ease of operations.

Largest usable compartment capacity in the industry. Fully enclosed and unobstructed from plumbing controls and connections with roll-up or pan-style doors.

Spacious cab is designed for one-person operation but offers five-person comfort and safety.
