The E-ONE Combo Unit merges the innovative command area technology of the E-ONE Mobile Command Center with the organized storage capabilities of the E-ONE Non Walk-In Rescue to build a Combo Unit second to none.

With storage features such as rooftop, rear, underbody and transverse compartments, the E-ONE Combo Unit allows first responders to efficiently store all the necessary gear to arrive on the scene prepared.

The L-shaped command area can be equipped with camera packages, video monitors for satellite feeds, DVD / DVR equipment and weather stations.

Available on both a custom and commercial chassis, the E-ONE Combo Unit meets first responder's needs without sacrificing safety or quality.

INTERIOR OPTIONS

Interior command area with bookshelf and monitor to outside camera.

Command Desk with enclosed upper storage and slide out desk top.

STORAGE SOLUTIONS

Up to 5 ft. wide compartments with adjustable shelves to meet changing needs.

Hydraulic system compartments. Reels (roof-mounted and in rooftop compartments) and tools all in one place.

Multiple slide-out tool boards to handle all tools, large or small.
